Team, we are working through the geophysics evaluation and working to obtain a contractor for the field work. We have run into some complications with contractor scheduling and are not certain of the start date. I do not anticipate knowing the schedule until late next week and will update you as soon as we have confirmation. Until then, please hold any site travel plans.

Thank you for your patience as work through these complications.

Subject: Wilcox Revised Field work Schedule

Good Morning, I am sending this email to update you on the progress and change in field work schedule. The review of the geophysics data and the scheduling of contractor will need an additional week. The planned field work is now scheduled to **begin the week of October 26**, and is expected to run through the following week to November 6.

As during the last field event, if you are interested in coming to the site, please let Todd Downham, Tom Kady, or I know so that we can prepare for your visit.

Thanks
